SHURE AXIENT® DIGITAL 4-CHANNEL MICRO LAV SYSTEM

Basic pkg includes: AD4Q 4-Channel Digital Receiver
Shure Axient® Digital ADX1M Transmitters
AXT600 Axient Spectrum Manager
AD610 Diversity ShowLink® Access Point
SBRC Battery Rack Charger and/or SBC840M 8-Bay Networked Charger for SB910M batteries

Shure Axient® Digital Wireless Microphone System

Axient® Digital integrates the most cutting-edge innovations of Shure's professional wireless audio technology into a groundbreaking, feature-rich, system that brings an unprecedented level of signal stability, sound clarity, & confident, superb performance to the most challenging RF environments.

The AD4Q Four-Channel Digital Receiver — sets a new standard in spectral efficiency with features that include a wide-tuning range up to 184 MHz, low latency, High Density (HD) mode, Quadversity mode for extended antenna coverage & improved RF signal-to-noise, true digital diversity reception per channel for drop-out resistance, networked control, AES3+AES67+Dante™ output, and signal routing options.

The AXT600 Axient Spectrum Manager — provides wide-band UHF spectrum scanning, analysis, and compatible frequency coordination — scans and analyzes the global UHF spectrum (470-952 MHz) in approx. 1 minute — enables powerful RF protections, interference detection & avoidance via ShowLink® — is compatible with Axient® Digital & other Shure networked wireless sytems — and, easily connects to your computer or ShowLink™ Access Point via 2 Ethernet ports.

The ADX1M - Micro Bodypack Transmitter — is an incredibly small, smooth bodypack with internal antenna for better concealment & comfortable wear — delivers impeccable audio quality & RF performance, is equipped with ShowLink® remote control for real-time parameter adjustments & interference avoidence, and features wide tuning, High Density (HD) mode, sealed switches & LEMO connectors for moisture protection. Up to 7 hours of runtime with the SB910M rechargeable battery.

The AD610 Diversity ShowLink® Access Point — enables real-time remote control of all ShowLink-enabled Axient® transmitters, including both ADX & AXT series models — up to 24 transmitters per access point.

The SBRC Battery Rack Charger — accommodates up to 8 Shure rechargeable bodypack & handheld transmitter batteries in a single rack space, providing a seamless, touring-ready battery charging & storage solution. **The SBC840M 8-Bay Networked Charger** provides a compact charging & storage solution for up to 8 SB910 batteries.

HOLLYWOOD SOUND SYSTEMS is pleased to be a distributor of Shure Pro Audio products — including the Axient® Digital System — for rental and sale — offering advanced audio solutions for state-of-the-art sound. Let us assist you! — 323-466-2416
