LITTLE TESOROS THERAPY SERVICES

A PEDIATRIC THERAPY RESOURCE.

# Introduction to the TheraSuit Method Intensive Program

The TheraSuit Method Intensive Program is designed to accelerate functional outcomes of traditional therapy services. Participants engage in an individualized strengthening program for 3 hours a day, 5 days a week, for 3 consecutive weeks.

A variety of tools and techniques including the TheraSuit and the Universal Exercise Unit allow participants to achieve accelerated functional outcomes.

From Drew's mom:

Drew saw the results of Therasuit today. Some amazing walking (assisted) in the house, transfers in/out of tub! Not a single buckle of the knees. Drew asked to do Therasuit again. When can he?

That's so awesome to hear!!! I knew he could do it if he would just believe in himself!!! Thanks for sharing that, it swells my heart 🤗🥰

This kid climbed the playscape and did the slide 4 times on Saturday! He hasn't done that in like a year and a half! Thanks therasuit Amberly!

It was a miracle I'm not even kidding! Reciprocal steps too!

### The TheraSuit:

Improves proprioception.

Reduces pathological reflexes.

Restores proper patterns of movement and posture.

Provides external stabilization and supports weak muscles.

Corrects body alignment.

Improves hip alignment through vertical loading over the hip joint.

Provides tactile and sensory stimulation.

### The TheraSuit also:

Stimulates the brain to re-train the Central Nervous System.

Improves speech production and fluency.

Loads the body with gravity type pressures.

Accelerates the progress of newly learned movements and functional skills.
