

Pre Enrollment Information Esthetics

Graduation, Licensure and Placement Rates

Below are the statistics about the students who released information from their cosmetology state board exam to The Salon Professional Academy. By law, the students have a choice about the releasing this information to their school. Therefore, the information provided does not reflect the total picture of this program.

The following information is based on the outcomes submitted to NACCAS via the Annual Report. The required reporting period is 1/1/2023-12/31/2023.

Graduation Rate: 96.91% or 94 out of 97 students in the esthetics program scheduled to graduate between 1/1/2023-12/31/2023 graduated.

Licensure Rate: Of the 94 graduates 46 reported back with exam results. 100% or 46 of the 46 reported graduates passed the exam.

Placement Rate: 82.61% or 38 of the 46 licensed graduates reported finding jobs in the cosmetology industry.

**The Salon Professional Academy Cumulative Rates:
Graduation: 95.81% - Licensure:100% - Placement: 90.91%**

Compensation Expected:

Esthetics graduates earn from \$20,000 to \$30,000 in salary and gratuities in an entry level position depending on the work schedule and the area population. A commission scale is commonly used to pay estheticians resulting in much higher pay after an introductory period of several months. Retail commissions are also common. Many salons now offer benefits resulting in higher earnings.

Physical Demands of Esthetics:

There are few physical demands in the area of Esthetics. Because this job requires that you stand, it is suggested that you wear proper fitting, supportive shoes.

Safety Requirements of Esthetics:

Safety suggestions for this profession include wearing shoes that would not be slippery when walking on a damp floor. Because you will always be working with water, there is a risk of water spills. All water spilled should also be wiped up as quickly as possible. It is the responsibility of each esthetician to promote a safe working environment. Gloves should be worn during chemical services to reduce any allergic reaction that an individual may have to certain chemicals. Any product that would accidentally get into the eyes should be flushed thoroughly with water. Seek medical attention if irritation continues.

Licensing Requirements for Esthetics in Missouri:

Esthetics graduates completing 900 hours and all course work may be eligible to take the Missouri state board exam. Upon passing the Missouri state board exam, graduates will receive a esthetics license in Missouri. The Missouri state board is a two-part exam. One part is a written exam covering the theory of practices and procedures related to esthetics. The other is a practical exam where graduates will demonstrate their skill set on services, sanitation, and disinfection practices. Graduates must receive a 75% or higher to pass each part of the exam.

I have read and understand the information provided above prior to signing my enrollment agreement.
