

# Westcave Nature Name Scavenger Hunt

During your walk at Westcave Preserve discover your inner detective and try to find as many natural objects that start with each letter of your first name. When you discover a natural object that starts with a letter in your first name take a photo of it.

Challenge: Try to find at least one natural object of each letter for everyone's name in your group.

## Wrap up Questions

At the end of your hike, try answering the following questions:

- Did you find a natural object that starts with each letter in your name?
- Were some letters easier to find objects for than others?
- What was your favorite discovery along your hike?

## At Home Extension:

When you arrive back at home pick one photo that corresponds to each letter of your name. Assemble those photos to spell out your name either on a computer or by printing them out. Display your "Nature Name" in your home.

- What do you think of your nature name?
- Do you think your nature name describes you?
- How can you live up to your nature name in your outdoor exploration?
