

# GET A FLU SHOT NOT THE FLU

YOUR ON-SITE  
FLU CLINIC  
PROVIDED BY:

## WHO SHOULD GET THE VACCINE?

### EVERYONE 6 MONTHS AND OLDER

Everyone 6 months of age and older should get the flu vaccine. Seasonal flu vaccines have a very good safety track record.

### PEOPLE AT HIGH RISK

It is especially important to get the vaccine if you, someone you live with, or someone you care for is at high risk of complications from the flu.

- ✓ Children & Infants
- ✓ Pregnant Women
- ✓ Seniors
- ✓ People with Disabilities
- ✓ People with Health Conditions
- ✓ Travelers & People Living Abroad

### STOP THE SPREAD OF THE FLU!

Flu season usually peaks in January or February, but can occur as early as August and as late as May. Early immunization is the most effective, but it is not too late to get a vaccine as late as December or January.

## A LESSON ON THE FLU SHOT

Made with inactivated (killed) flu virus

Given by a needle

Approved for use in healthy people older than 6 months and people with chronic health conditions
