MEDSAVERS GEL

MedSavers Gel is a unique topical anhydrous silicone base that can be used alone or in combination with other medications topically.

RECOMMENDED USES

MedSavers Gel can be used for any of the following skin conditions including:

- burns
- scars (new, old, surgical)
- keloids
- stretch marks
- acne scars
- diaper rashes
- other skin wounds that would benefit from barrier protection

MedSavers Gel contains Pracaxi oil. It is a unique ingredient with anti-inflammatory properties and is used for a variety of dermatological conditions.

DIRECTIONS

Apply sparingly to the affected area(s) 2 to 3 times daily until healing results are achieved.

INGREDIENTS

Cyclopentasiloxane, Polysilicone-11, C30-45 Alkyl Cetearyl Dimethicone Crosspolymer, PEG-16 Macadamia Glycerides, Dimethicone, Oenocarpus Bataua Fruit Oil, Pentaclethra Macroloba Seed Oil, Phosphatidylcholine, Tocopheryl Acetate, BHT

FREQUENTLY ASKED QUESTIONS

Can it be used orally? No, the raw materials used in the base have not been approved for oral use.

Can it be used on animals? Yes, there are beneficial reports with use in dogs, cats, snakes, and horses.

Does it wash off easily? No, since it is an anhydrous silicone gel, it does not wash off easily. This increases the wear time and barrier protection potential.

How soon after surgery can it be used? Immediately, as it is safe to use on open wounds.

Is it safe in pregnancy and breastfeeding? There have not been any studies in this population.

Is it a good protectant from body fluids such as diarrhea or leakage around an ostomy site? Yes, the silicone gel is a good protectant and will stay in contact with skin longer.
