

NEW Class!

Weekly In-Studio

Thursdays @ 7:30-8:30PM

BREATHWORK

with Dr. Brian McCarroll, DPT

**No Prior Breathwork
Experience Needed -
Everyone Welcome!**

Regular Class Rates Apply Or \$17 Single Class Drop-in – FREE To All Unlimited Members!

BREATHE FREE! This class is for anyone looking to expand their knowledge of proper breathing technique in daily life and/or fitness activities, those suffering from respiratory related issues, and Yoga/Fitness instructors interested in expanding their horizons in breathwork. No prior fitness or breathwork experience needed. Bring a yoga mat (or use one of ours) and wear comfortable warm clothing. **Beginners are always welcome and you can join any of our weekly sessions anytime.**

This breathwork class is inspired by various styles of breathwork from the Wim Hof Method and its Tummo style, to the Buteyko method and others, combined with some gentle restorative Yoga and guided meditation. We will focus on varying areas of your body, breath and mind weekly to give you the tools and experience to make long-lasting change.

You will develop control over systems that you otherwise hadn't thought possible. We will demonstrate this by showing you can do things like hold your breath much longer than you think, get in touch with and gain more control of your body. These techniques will enable you to reduce stress, anxiety, pain and inflammation, improve sleep, confidence and endurance - all simply by breathing in a manner that allows you to use your chest, lungs, brain, and entire body more effectively.

Things to think about after class are: how you feel, how well you are able to go to sleep, how well you are able to maintain your sleep, how much energy you have, how your regular aches and pains feel, and your mood. Group discussion to address your questions, areas of interest, and progress will be part of each weekly session.

Learn to breathe more effectively to harness your true potential. Your body responds to the breathing and your intention in very healthy ways. Unlock blocked areas of your body and release adrenaline - *all through the use of your breath!*
