Learn safe and effective ways to stretch and strengthen the musculature of the hips, pelvis, and sacroiliac joints. We will use adapted Yoga postures and breathing practices to release tension, improve mobility and balance musculature asymmetry. The evening will conclude with a guided relaxation and breath meditation. Prior Yoga experience is helpful, but not required.

The movements are gentle and each person will work within their own range of motion. If you have acute pain or are very sensitive to movement, an individual Yoga Therapy session might work better for you. If you're not sure what is most appropriate for you, please contact Tracy at tracyflynn@hotmail.com or 248-334-7381.
