	1.4%	

The pink boxes represent the "canonical" number, which must be the most prominent number a school uses in its advertising.

Hack Reactor Remote

Current Percentages and Projections

H1 2018

Updated: 11/2/2018

This is the in-progress 2018(1) CIRP placement report for Hack Reactor Remote. We provide it here to add additional information and context for current and prospective students. It includes all students who graduated between January and July of 2018. Half of the graduates contained are still within 180 days post-graduation and actively job searching, thus none of these numbers are final.

Note: You will notice that the 2018(1) Remote numbers are predicted to be different than previous reports. Please note that **the "Unemployed" percentage for the upcoming report is predicted to be in line or lower than previous reports**, while the "Employed in other Positions" category is projected to be much higher than previous reports. What this tells us is that our graduates are choosing a wide variety of career paths after graduation and not always choosing the category "1" options. Our goal is to have our graduates employed in a job they love, regardless of what category it falls under, based on these numbers we believe that is still happening.

* Predicted numbers are based on current projections made by career services and are not final.

Historical Data			What were the employment results for graduates?	Upcoming Reporting Period	
2016(2)	2017(1)	2017(2)		Current 2018(1)	Predicted* 2018(1)
