Agreed-upon procedures on Fullstack Academy, Inc.'s Student Data, Employment Outcome Rate, and Graduation Rate for Enrolled Students who graduated during the period of July 1, 2016 through December 31, 2016.

Definitions:

- A. Published Course Length:** For fixed-length programs, the Published Course Length must be in calendar days such that the following statement is true: If a student needs to repeat a module/section prior to meeting the graduation criteria, he or she should not count as graduated in 100% of the program length.

For self-paced programs, schools must report on all students who enrolled 12 months prior to the reporting period's start date until 6 months prior to the reporting period's start date. They must report the graduation rate by dividing the total number of graduates from the dataset by the total amount of enrollments from the dataset, and report the time to graduate as a table by dividing the number of graduates in six 30-day periods by the total number of students in the report.

- B. Employment Outcome Rate** – Calculated based on dividing (i) the number of graduates available for employment who accepted an offer of gainful employment within 90 and 180 days of graduation by (ii) the number of graduates available for employment. The Employment Outcome Rate is calculated as an aggregate number for all graduates of the Web Development Immersive-New York, New York campus.
- C. Graduates**– Calculated based on the number of students who have successfully completed the requirements for graduation, including, completing all course modules, clearing checkpoint assessments, completion of career success checklist, and enhancing the Fullstack community. Students who successfully completed the requirements are eligible for graduation
