	3.3%	

The pink boxes represent the "canonical" number, which must be the most prominent number a school uses in its advertising.

Hack Reactor Los Angeles

Current Percentages and Projections

H1 2018

Updated: 11/2/2018

This is the in-progress 2018(1) CIRR placement report for Hack Reactor Los Angeles. We provide it here to add additional information and context for current and prospective students. It includes all students who graduated between January and July of 2018. Half of the graduates contained are still within 180 days post-graduation and actively job searching, thus none of these numbers are final.

Note: We have worked hard on iterating in LA to increase outcomes for our graduates from that campus. What we see here is the fruits of those efforts start to grow. We're also happy to report that the second half of 2018 is shaping up to be even better than this first half!

* Predicted numbers are based on current projections made by career services and are not final.

Historical Data			What were the employment results for graduates?	Upcoming Reporting Period	
2016(2)	2017(1)	2017(2)		Current 2018(1)	Predicted* 2018(1)
