

Wi-Fi Reels Go Wireless!

Now with the Hathorn Wi-Fi reels you can complete inspections without the use of a traditional monitor. The Wi-Fi reels send a wireless WIFI signal directly to your mobile device in high definition video that can then be recorded and saved in your photo folder. Once the video is selected it can then be sent via text, email, airdrop, Facebook, Cloud, etc. The possibilities are endless. Multiple reel sizes, pushrod diameters and camera heads are available.

Key Features

- Monitor free reels, NO cords, NO heavy monitor cases, NO screens to damage.
- Easy wireless video transfer from reel to mobile device.
- On screen resettable footage counter.
- 512Hz powerful SONDE transmitter.
