

## *Expand the Delivery of Care*

NuCara's IV Me program's approach to infusion therapy promotes IV utilization of all types on site and emphasizes nurse education, which strengthens the delivery of care, grows capabilities and raises the level of professionalism in customer facilities.

### *With the IV Me infusion therapy program, Long-term care facilities benefit by:*

- Raising census and enhancing marketability by appealing to a broader spectrum of potential residents
- Providing educational support for nursing staff including practicums for skills demonstration
- Accessing round-the-clock support and reducing adverse therapy events with 24-hour access to our IV pharmacist or nurse
- Improving facility bottom line by adding reimbursable services and eliminating the expense associated with off-site IVs

### *With the IV Me infusion therapy program, residents can receive a complete offering of IV medications, equipment and supplies, including:*

- Hydration
- Antibiotics
- Total Parenteral Nutrition (TPN)
- Pain Management

## *Training Includes:*

- Hands on CADD and Baxter pumps
- Elastomeric and Control-o-flo devices
- Care of PICC lines
- Dressing changes
- Peripheral IV starts
- Drawing labs
- Infection control
