

ZoSil

- A silicone hydrogel base designed specifically for animal skin
- Used on mammals, birds, and reptiles
- Improves the appearance of red, flaky, irritated skin
- Moisturizes the skin while delivering medications to the surface of the skin
- Ideal as a base in dermatological and wound-care formulations
- Absorbs rapidly into animal skin, leaving no greasy residue
- Natural ingredients include conditioners to promote healthy, shiny fur without matting or gumming
- Formulated without toxic ingredients, not harmful if licked
- Formulated without dairy, casein, gluten, soy dyes
