

Content Management

Pre-configured Content Sections

Start with one of our 20+ pre-configured content sections or build your own with any combination of image galleries, videos or text blocks.

Unlimited Bandwidth & Storage

Add years worth of blog posts, embed videos, upload images, and you'll still never run out of space for your content.

Unlimited Pages

Add as many pages as you need. Nest them in drop-down menus, or hide them in your navigation to link to or use later.

Content Integration

Our collections platform allows seamless integration of your existing content sources directly into websites.

In-line Text Editing

Simply highlight any copy in the design panel and type away.

Images & Galleries

Add unlimited images to your galleries, then quickly design and customize their layout so every single one looks great on the page.

Password Protection

Easily password protect pages or entire sections of your website.

Video

Include your YouTube, Vimeo or Kickstarter videos on any page of your website by copying and pasting the embed code.

Audio

Play your music on any page within your website by simply embedding audio tracks from Spotify, Bandcamp or SoundCloud.

Social Feeds

Stay up to speed with search engines and connected to customers by pulling your Twitter, Facebook, Instagram and Google+ feeds.

Products

Showcase your products anywhere on your website.

Menus

Our menu block automatically formats content and includes your item title, description and price.

Locations

Help users find you by integrating your address and adding Google Maps to your website.

Search

SpaceCraft offers Google Custom Search that adds a search box to your site to help people find what they need on your website.

Buttons

Easily add a button to your website and then customize the text, color, and shape to fit your design.

Forms

Set up appointments, offer registration for events and learn more about your customers by creating forms with Wufoo or Formstack.

Email Subscription

Build an email list with your preferred email marketing platform. Place the field on any page and watch your subscriptions grow.

HTML Code

Use our code blocks to input custom code.

Designs

Responsive Designs

Every website created on the SpaceCraft platform is completely responsive and scales across mobile, tablet, and desktop devices seamlessly.

Beautiful Templates

Start with one of our professionally designed templates and customize it to make it your own.

Background Image Controls

Background images can be added at a sitewide, page and now block-level giving you even greater design control.

Parallax Scrolling

Background images glide below your floating content as users scroll up and down.

Layout Options

Switch up the look of your whole website or just a page with a couple of clicks.

Columns & Containers

Feature specific content and highlight images by designing containers, adding drop shadows, or creating a grid.

Free Typekit Fonts

Our partnership with Typekit allows you to add the highest quality fonts to your website.

Spacing Controls

Customize the line, character, and word spacing of the text on your website.

Padding Controls

Advanced padding controls allow for more design customization of your website.

Save Designs

Save your designs every step of the way. Your hard work is safe with us.

Restore Last Published Design

Not sure about some changes? Restore your website to the last version that you published.

Reset to "Sitewide"

Easily reset any page-level design change to your global settings with a single click.

Mobile Settings

Customize the mobile navigation and mapping settings of your already-responsive website.

Custom CSS

Use Custom CSS with any template design through our built-in editor.

Images

Responsive Images

As you upload images, SpaceCraft generates scaled versions of each original file so that the right image size loads for every device.

Drag-and-Drop

Drag images directly from your desktop onto your browser to add or replace images.

Image Categorization

All images added to your website are auto-categorized and saved in the image library.

Image SEO

Easily add titles, descriptions and tags to every image on your website.

Hover Effects

Add impactful effects to your images when users roll over them with their mouse.

Fast Image Serving

SpaceCraft hosts your images and reduces load times by utilizing content delivery networks (CDN) around the globe.

Galleries

Gallery Blocks

SpaceCraft Gallery Blocks offer multiple presentation styles for your images, including slideshows, stacked, and grid layouts.

Grid Layouts

Decide how you want to set up your images using one of our multiple grid options and adjust the columns and spacing to make it just right.

Carousel Gallery

Images smoothly shift along a horizontal path onto the screen creating a stunning layout for your images.

Thumbnail Galleries

Utilize automatically generated thumbnail images to navigate your amazing images.

Lightbox Presentation

Present beautiful, full-sized imagery with just one click with our integrated lightbox functionality.

Auto-Cropping

Crop images to perfect squares for a consistent look across your gallery.

Animations

Multiple transition effects are available in each gallery.

Video Galleries

Engage website visitors by adding YouTube or Vimeo videos and let your video content take center stage.

Customizable Galleries

Choose from dozens of styles, arrows, layouts and more with our highly customizable galleries.

Third-party Apps

Social Connections

Stay connected to customers and current for search engines by pulling your social feeds right into your website.

Social Links

Let your visitors find and follow you on every major network with social links built into your site design.

Analytics Providers

Quickly add Google Analytics, Clicky, GoSquared, StarCounter and more to track your website traffic.

Commenting Systems

Choose from the top commenting platforms including Disqus, IntenseDebate and LiveFyre to power your online conversations.

Forms Integration

Add your Woofu or FormStack forms directly into your SpaceCraft website. No coding required.

Email Capture

Grow your email list with newsletter subscription forms on your website using your favorite email service providers including MailChimp, ConstantContact, Emma and more.

Reservations

Let visitors make a reservation for your restaurant by including an OpenTable reservation on any page.

Website Management & More

Add custom CSS to any of your designs through our intuitive code editor.

Reporting

View traffic and site status reports at the touch of a button.

User & Organizational Controls

Unlimited Contributors

Set permissions for each contributor to your site using the Website Manager.

Roles Management

Easily manage roles, change ownership, user access and more from one dashboard.

Multiple Site Management

Access and manage multiple SpaceCraft sites at once using a single login.

Login with 3rd Party Services

Use Facebook or Google login information to create and link accounts.

Multiple Payment Options

Add multiple credit cards to easily apply payment to all your different websites.

Customized Billing Tools

Organizations that manage multiple websites can charge customers directly or let SpaceCraft handle the billing.

Notifications

SpaceCraft notifications quickly let you know when there's activity related to your website.

Administrative Privileges

Add, copy, suspend, or remove websites from your business organization.

Activity Reporting

Get reports on activity within your organization. View and access franchise or branch websites through your own custom control panel.

Bulk Actions

Add users or perform other tasks across multiple websites at once.

White-Label Solutions

Qualified resellers can incorporate their own branding and sub-domain to the SpaceCraft platform.

Search Engine Optimization

Schema.org Support

We're experts on best practices for SEO. Our approach to structured content leverages industry standard schema.org principles.

Advanced SEO Tools

Our SEO tools allow you to quickly add title tags, descriptions, keywords, and image alt text to your website.

Microdata and Rich Snippets

All SpaceCraft websites automatically include microdata to help search engines use data from your webpage to provide a richer browsing experience.

Automatic Google Sitemaps

SpaceCraft automatically generates and links a proper sitemap.xml that enumerates every single URL on your website.

Automatic Tagging

To improve search engine indexing, all pages contain proper title tags.

Canonical URLs

Help prevent duplicate content issues by telling search engines which page should be credited as the original with our simple tool.

Legacy URLs

Make sure you never lose a visitor to a 404 error by redirecting no longer existent pages to active sections of your website.

Scalable Architecture

Created with SpaceCraft

"We eat our own dog food" as the saying goes. Our website is hosted and built on our own SpaceCraft platform.

Scaling

Our servers are hosted on the cloud providing you with security and scalability.

Cloud Infrastructure

You have enough on your mind without worrying over your website crashing. Our servers are securely hosted on the cloud and can handle large amounts of traffic.

Content Ownership

Ownership

You retain ownership of all the content and assets you add to the SpaceCraft platform.

Privacy Protected

We promise never to sell your personal data to 3rd party marketing firms.

Free Trial

Try us for free for 14 days, no credit card required.

Custom Domains

SSL Encryption

All SpaceCraft websites include HTTPS, the most secure protocol available for websites today.

Multiple Domain Support

Point as many domains as you like to your SpaceCraft account.

Google Apps Integration

Set up personalized email addresses with Google Apps.
