

Remington Drug Co
207 E. Main Street
Remington, VA 22734
(540) 439-3247

Dear Provider:

Remington Drug Company is pleased to offer diabetes self- management training (DSMT) that is accredited by the American Association of Diabetes Educators (AADE). DSMT is individualized for each patient and covers the following:

- Understanding diabetes as a disease process
- Nutritional management
- Physical Activity
- Medications
- Self-monitoring
- Psychological adjustment
- Goal setting
- Problem solving
- Prevention, detection, and treatment of acute complications

DSMT is covered by Medicare and most commercial insurances. For Remington Drug to bill this service, CMS and other payors require a referral form signed by a **doctor**.

Included in this packet is our referral form and contact information to assist your office in sending the signed referral form to us, along with instructions to be given to your patient. You may also find these forms on the Remington Drug website www.remingtondrug.com.

Once we have received the signed referral form from your office, we will contact your patient to schedule their sessions.

We feel that our educational sessions will create a renewed sense of urgency in our mutual patients to listen to their doctor and follow through with the guidelines you have set. One of our goals is to reinforce vital training you have previously provided to the patient.

We welcome any diabetic or pre-diabetic patient that you would like to refer to us for pharmacy services and diabetes education.

Sincerely,

Margaret V Rowe, PharmD
Diabetes Education Program Coordinator and Instructor
