

## “Why We Love Crestview & our Home @ 7805 Mullen”

### >> *Decorating Our Outdoor Space*

“In the front, we installed a gorgeous agave with ghost plant succulent underneath. Silver pony foot covers the remaining low-water landscaping. There’s also our plum tree...love plums! The manicured turfed lawns are the best - clean green grass with no watering. Our favorite is a trellis in our center yard. Native vines climb and bloom pretty little white flowers that bring hummingbirds, robins, bees & butterflies. It’s great to watch them while we enjoy our morning coffee and as our two pups play in the yard.”

*“It is awesome living among so many trees and yet close to everything. We can bike to grab a slice of pizza and get a scoop of ice cream at our neighborhood joints. It’s easy to get to know our neighbors - kids & “fur babies” out with their families - playing, strolling, and mingling.*

*We LOVE this home. We put so much work to make it open, warm & relaxing. There are so many special details, we hardly know where to begin!*

*We wanted the house to be as close to net zero as we could. It sits on a big lot. We worked with Studio Momentum to build a back house for our parents, so they can be close by and yet have their own space.”*

### >> *Unwind in my home spa*

“Loved sitting in the over-sized soaking tub after a long day. It always made me feel like being at the spa.”

### >> *Sustainable Home*

“Solar system provides all our electricity needs. Metal roof. Low-watering landscaping & turfed lawns.”
