DIFFERENTIATED PROCESS

We seek to identify opportunities by comparing **market valuations** (enterprise value or "EV") to **book value** of invested capital ("IC"), instead of screening for yield. Higher-return companies at reasonable EV/IC could be better performers over time.

Note: Average EV/IC and ROIC metrics based on average of public MLPs >\$2bn in market cap, Bloomberg, Recurrent research

Risk Disclosure (RMLPX)

Mutual Funds involve risk including the potential loss of principal. Higher turnover and frequent trading may result in higher costs. Cash available for distribution by MLPs may vary and could be affected by the entity's operations, including capital expenditures, operating, acquisition, construction, exploration and borrowing costs, reducing the amount of cash and MLP has available for distribution. The Fund may focus on one or more industries, sectors or geographic regions of the economy and the value of an investment may fluctuate more widely than if it were diversified. Tax risks associated with the Fund include fund structure risk, MLP tax risk, and tax estimation/NAV risk. Cyber-attacks or failures affecting the Fund or service providers may adversely impact the Fund or its shareholders.

The Fund invests primarily in the energy sector and infrastructure industry and is susceptible to adverse economic, environmental, and regulatory concerns. Additional risks include acquisition, catastrophic event, commodity price, depletion, natural resource, supply/demand and weather risk. The purchase of IPO shares may involve high transaction cost, market and liquidity risks. The investment strategies employed by the Advisor may not result in an increase in value or performance. Overall equity market risk may affect the value of individual instruments in which the Fund invests. Holders of MLPs have limited control and voting rights, additionally, there are certain tax risks and conflicts of interest between holders of MLPs and the general partner. 3001-NLD-01/04/2023
