

HILCO Electric Cooperative, Inc.

2023 Ceiling Insulation Rebate

One of the most cost-effective ways to make your home comfortable, regardless of the outside temperatures, is to add insulation to your attic. Adding insulation is relatively easy and inexpensive.

HILCO Electric Cooperative offers free home energy audits. If during an audit, your home is found to have less than 3.75 inches of insulation, you will be eligible for the rebate program. Simply increase the insulation in your attic to 17 inches (R-38) or more, within sixty days of the home audit, and, upon verification by a HILCO representative, you will be paid \$300.00. It is that simple!

The rebate program is limited to single family homes, not mobile homes; with electric air conditioners and electric heating in place.

A HILCO representative must verify the insulation level both before making the improvements and after improvements are made so call today (800) 338-6425 and schedule your FREE home energy audit! Remember, the final inspection must occur within sixty days from the initial energy audit so don't delay!

Limit one reimbursement per household and/or membership per year. Rebate program will end when all funds are depleted. Commercial builders are not eligible for rebates. Permanent residents or occupants may apply.
