

## **HILCO Electric Cooperative, Inc.**

### **2026 Manufactured Home Solid Underpinning Rebate**

While some manufactured units sit on foundations, most are placed on jack stands or blocks concealed by skirting around the base of the unit. Over time, skirting often fails and is removed, allowing air to flow underneath the home. Additionally, without solid underpinning, animals and rodents can access the underside of the home, causing damage to insulation and duct work which results in dramatic energy loss.

Call HILCO Electric Cooperative today for a FREE Energy audit and a pre-home inspection. If your home is found to be in need of solid underpinning, simply install the skirting and call HILCO within sixty days of installation for a post-home inspection to be eligible for a \$200 rebate.

A HILCO representative **MUST CONDUCT** a home **INSPECTION** both **BEFORE** underpinning installation **AND AFTER** installation is complete so call today **(800) 338-6425** and schedule your inspection! Remember, the final inspection must occur within sixty days from the initial inspection and within the current rebate fund year.
