

HILCO Electric Cooperative, Inc.

2021 Manufactured Home Solid Underpinning Rebate

While some manufactured units sit on foundations, most are placed on jack stands or blocks concealed by skirting around the base of the unit. Over time, skirting often fails and is removed, allowing air to flow underneath the home. Additionally, without solid underpinning, animals and rodents can access the underside of the home, causing damage to insulation and duct work which results in dramatic energy loss.

Call HILCO Electric Cooperative today for FREE Energy audit and a pre-home inspection. If your home is found to be in need of solid underpinning, simply install the skirting and call HILCO within sixty days of installation for a post-home inspection.

The \$200 rebate is limited to one rebate per member and available until funds are depleted. Commercial builders are not eligible for rebates. Permanent residents or occupants may apply.

A HILCO representative must conduct a home inspection both before making the improvements and after improvements are made so call today (800) 338-6425 and schedule your FREE home energy audit! Remember, the final inspection must occur within sixty days from the initial energy audit so don't delay!

Limit one reimbursement per household and/or membership.
