

***My Favorite Assignment 2017***  
**Email: Makeovers for Subject Lines**  
**FAQs**

**Are there other options available for subject line?**

Yes, students came up with a lot more scenarios/options for subject lines. You can see more examples in the rubric provided. You will see there are more answers than originally provided. This happened organically in the classroom.

**Must students always write subject lines this way?**

No, as students get more confident in email writing, they can create their own subject line style. However, this exercise helps students determine a purpose and topic.
