YOUR SOURCE FOR CUSTOM PLASTICS COMPONENTS

Custom and Stock Extrusions
Injection Molding / Insert Molding
CNC Machining / Sheet Fabrication
Value Added Fabrication & Assembly
Design and Development Assistance

STOCK EXTRUSIONS

SeaGate Plastics Produces a wide range of stock extruded components including angle stock, u-channels, “H” sections and dunnage retainers. By taking advantage of stock extrusions, customers often eliminate tooling costs and reduce their order-to-delivery times. Call us or visit our website to obtain a digital version of our plastic component catalog.

CUSTOM EXTRUSIONS

Beyond stock extrusions, SeaGate Plastics can produce virtually any component that lends itself to the extrusion process. If you have special requirements, we invite you to discuss them with our technical staff.

INJECTION MOLDING

SeaGate Plastics specializes in injection molding and related processes. Machine capabilities range from 50 to 650 tons. Processes such as insert molding (encapsulation of metal or other type substances in plastics) and standard injection molding are readily available to meet your specialized molding needs.
