- Ideal for patella conditions including instability and Osgood-Schlatter Disease
- Conforming compression to help improve patella tracking

Suggested HCPCS: A4466

This document includes codes that might be used to bill for BSN medical products and related services. Each provider will have to verify the appropriate codes for each patient. It is the provider's sole responsibility to determine and submit appropriate codes, charges, and modifiers for services rendered. Providers should contact insurers to verify correct coding procedures prior to submitting claims related to any product or service. BSN medical Inc. cannot guarantee coverage or reimbursement with the codes listed in this billing guide. In all cases, providers will need to follow local payer policies for billing and reimbursement.

Immobilize

For moderate to severe conditions requiring little to no movement of the affected area. For use during initial recovery.
