September 2019

News we can't wait to share...

Any day now you should be receiving a copy of our Fall 2019 magazine in your mailbox. But this is news we just couldn't wait to share!

You know how some doctors are excellent at the technical part of their job, while others are so personable and somehow make you feel like the most important person in the world?

Well, the 12 people listed below are *both*.

We are glad to be able to share with you the 2019 Service Excellence Award recipients. Every year we give this award to physicians who have demonstrated an extraordinarily high level of integrity, compassion and care to you and your peers in the Healthnetwork community.

For 28 years we have been building relationships with top physicians like the men and women you see listed below.

Because of these relationships you have direct access to the nation's best hospitals and medical experts.

Access not only for medical care or to get a valuable second opinion—but also as a way to make your medical philanthropy more personal and intentional by giving directly to the individuals and areas of research you care about most.

And now, without further ado ...

We are pleased to announce the 2019 Service Excellence Awardees:
