

THE PERKS OF SEX EXTEND WELL BEYOND THE BEDROOM.

Cannabinoids are associated with elevated senses and enhancing the sexual experience. The BLISS formulation supports both through multiple mechanisms - like increasing natural nitric-oxide which stimulates blood flow. We added coconut oil because it's great for increasing natural lubrication, and the amino acid, L-Arginine, can safely increase vasodilation, improve blood flow and stimulate tissue.

EXPERIENCE BLISS

Shake well before use. A quarter size is suitable for many, but some may need more. Apply to wherever you desire, as BLISS is safe to use inside and out. Discover what works best for you.

BLISS should not be used with latex condoms, as any oil-based product can degrade the integrity, rendering it ineffective.

Hemp-derived | Legal in 50 states

BLISS IS FOR EVERYONE AND EVERY BODY.

As a nurse practitioner who focuses on sexual and reproductive medicine, I hear from so many patients who are underwhelmed or unfulfilled in their sex lives. This complaint is more common in women and often due to dryness or pain and, unfortunately, there are limited solutions.

For men, prescription drugs are available, but they're not always safe options. Folks who have undergone specific medical treatments, such as gender confirmation surgery, are often asking for safe options to enhance sensitivity.

I wanted to create a natural, effective alternative that could work for every body. When people enjoy sex and are empowered in their sex lives, they lead happier, healthier lives.
