WHAT IS ANANDA PETS?

Ananda Pets is a full spectrum hemp extract created exclusively for cats and dogs.

Just like us, our furry friends have an endocannabinoid system (ECS), a central regulatory system that plays an essential role in establishing and maintaining health. When the ECS is disrupted, any one of these things can fall out of balance. When the body does not produce enough endocannabinoids or cannot regulate them properly, we are more

susceptible to illnesses that affect one or several of the functions mentioned above. Luckily, the cannabinoids found in full spectrum hemp extract can help regulate the ECS.

Ananda Pets is 100% legal, safe and contains all-natural ingredients like coconut oil, Ananda hemp-derived extract and bacon flavoring. Coconut oil is an edible oil that is extracted from the meat of matured coconuts from the coconut tree and has been proven to be good for cats and dogs. It can help aid your pets' digestion, improve their coats, help prevent infection and much more.

HOW DOES IT WORK?

Pets have cannabinoid receptors found throughout the body and brain. These receptors work on pain, mood, appetite and inflammation which help restore normal balance and homeostasis. And just as CBD has helped humans, your pets can reap the same health-boosting benefits.

CBD may help pets who suffer from separation anxiety or noise phobias.

CBD has been extensively studied for its effect on stress and anxiety.

CBD can protect the nervous system and help with neurodegenerative diseases.

For dogs suffering from degenerative myelopathy and other spine and nerve issues, CBD shows a lot of promise.

CBD can increase appetite and help with nausea.

If you have trouble getting your dog to eat, CBD may help. The National Cancer Institute reports that CBD [increases appetite](#) and carries this extra benefit, in addition to controlling cancer. In animal studies, CBD has also been shown to help with [vomiting and nausea](#), even when they're the result of [toxins and drugs](#).

CBD shows promise in supporting:

- Neurology & cognitive function
- Immunity & allergy systems
- Hip & joint mobility
- Relaxation & comfort
- Everyday health & wellness
