**TOTAL HEALTH CARE SPECIALTY PHARMACY
ACHIEVES ACCREDITATION WITH ACHC**

Baltimore, Maryland, Total Health Care Specialty Pharmacy proudly announces it has achieved accreditation through Accreditation Commission for Health Care (ACHC) for the services of HIV and Hepatitis-C.

Accreditation is a process through which healthcare organizations demonstrate compliance with national standards. Accreditation by ACHC reflects an organization's dedication and commitment to meeting standards that facilitate a higher level of performance and patient care.

ACHC is a nonprofit organization that has stood as a symbol of quality and excellence since 1986. ACHC is ISO 9001:2015 certified and has CMS deeming authority for Home Health, Hospice and DMEPOS.

Total Health Care Pharmacies are the community pharmacies for Total HealthCare, Inc. a Federally Qualified Health Center (FQHC) dedicated to caring for everyone in our community—especially those who are most in need. We care for patients —nearly all of whom are at or below the 200% poverty line—at locations throughout Greater Baltimore.

We are proud of achieving the specialty pharmacy accreditation for our Division Pharmacy through the Accreditation Commission for Health Care (ACHC). This accomplishment goes to demonstrate our continued commitment to providing quick and better access to specialized medications to our patients and providing the white glove service required to ensure our patients achieve the best healthcare outcomes with their therapy.

With this accreditation we are now able to provide continuity of pharmaceutical care through our specialty pharmacy for patients who require specialty medications. This is important because patients no longer have to fill their regular non-specialty prescriptions and specialty prescriptions with multiple pharmacies, we can now take care of all their medication needs within our network of Total Health Care community and specialty pharmacies.

This is important because patients can now continue to receive specialty pharmacy services in a familiar environment and by their Total Health Care clinical pharmacy team which will further help improve medication adherence and therapeutic outcomes.
