- Stopped doing formal workshops once all of my How To books were on the market. I demonstrate how the board works at every art show we do, and I feel my time is best spent now working on new innovative removal methods and pushing scratchboard to an extreme as an example to new artists. I have found that I have gotten many artists started in the medium due to my introducing them to it and to the kits. They have gone on to demo the medium in art supply stores plus YouTube and at Art Fairs across the country

Retrospective book published in May 2016 by Rose Fredrick Publishing

All of my reproductions and collector plates have been of works done in colored scratchboard.
 All of the Art shows I have participated in have featured a body of my work solely consisting of
 scratchboard.

My purpose in life has been to get Scratchboard recognized as a fine art medium and to introduce as many
 artists and collectors alike to the medium.
