A WEEKLY NEWSLETTER PUBLICATION OF BECKER WEALTH MANAGEMENT

## Key market drivers keep encouraging numbers afloat.

**K**ey market drivers last week included a good slate of corporate earnings, encouraging global PMI data, and more details about the Biden plans for increasing taxes and spending.

Equity markets finished with minor gains primarily concentrated in REITs, healthcare, and cyclicals and yet another new record high for the S&P 500. Interest rates didn't move meaningfully either way last week, but the USD softened again following a strong first quarter. Commodities were boosted by nice gains in the grains, precious metals, and select industrial metals but oil declined slightly on the week.

### Market Anecdotes

- With 25% of S&P 500 companies reporting, FactSet estimates U.S. earnings beat frequency (84%), beat scale (23.6%), and blended growth (33.8%) are all trending at or near record highs.
- Bespoke noted equity market breadth (% stocks > 50 daily moving average) continues to look exceptional for large caps (83.8%) but the NASDAQ (35.6%) and R2000 (44.8%) aren't nearly as impressive.
- Google search trends for consumer spending-oriented information continue to 'trend' in a constructive direction with travel, leisure, and home improvement moving sharply higher.
- The 10yr U.S. Treasury seems to be amid a pause with technical floor and

Photo Source: www.bigstock.com

ceiling of 1.50% and 2.00% respectively.

- The Made in American Tax Plan is expected to hit 2022 earnings by approximately 8% as advertised but may be watered down to a 5% hit after compromise. BCA expects pressure to continue to raise corporate taxes well beyond 2022 given the current backdrop.
- The forthcoming American Families Plan will likely result in tax hikes for personal income and capital gains taxes.
- BCA suggests a global growth rotation from the U.S. to the rest of the world in the latter half of 2021 should be supportive for non-U.S. financial markets and currencies.
- To put some numbers to the potential 'CoVid' impact on the office sector, the American Institute of CPA survey found corporate plans to reduce office space increased from 17% to 20%.
- The labor market is continuing to improve but prime age employment remains

3.7% below pre-pandemic and overall, still 5% below January 2020.

### Economic Release Highlights

- March Existing Home Sales were soft, falling 3.7% (6.010M vs. 6.205M) for the month but New Home Sales rebounded nicely (1,021M vs. 887K), both following a weather challenged February.
- U.S. April flash PMIs followed up an unusually strong March by topping 60+ level estimates across all three measures (62.2 composite, 60.6 materials, 63.1 service).
- April flash PMIs for Japan (50.2 composite, 53.3 materials, 48.3 service) and the Eurozone (53.7 composite, 63.3 materials, 50.3 service) also beat across the board, posting healthy numbers across both manufacturing and service sectors.
- March LEIs came in above consensus at +1.3% versus consensus calls for a 0.6% improvement.

Investment Advisory Services are offered through Virtue Capital Management, LLC, an SEC Registered Investment Adviser. VCM and Becker Wealth Management are independent of each other. This newsletter is not to give investment advice. Before investing in any advisory product please carefully read any disclosure documents, including without limitation, the firm's Form ADVs. Indices do not reflect the deduction of any fees or expenses. They are not available for direct investment. Exposure to an asset class represented by an index is available through investable instruments based on that index. The Dow Jones Industrial Average (DJIA) is a price-weighted average of 30 significant stocks traded on the New York Stock Exchange (NYSE) and the Nasdaq. The DJIA was designed to serve as a proxy for the broader U.S. economy. The Nasdaq Composite Index is the market capitalization-weighted index of over 3,300 common equities listed on the Nasdaq stock exchange. It is used as a broad-based market index. The S&P 500 index is designed to be a broad based unmanaged leading indicator of U.S. equities and is meant to reflect the risk/return characteristics of the large cap universe or representative of the equity market in general. The Russell 3000® Index measures the performance of the largest 3000 U.S. companies representing approximately 98% of the investable U.S. equity market. Total Return assumes dividends are reinvested. The Russell 1000 is a subset of the Russell 3000 Index. It represents the top companies by market capitalization. The Russell 1000 measures the performance of those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth values. The Russell 2000 index is an index measuring the performance of approximately 2,000 small-cap companies in the Russell 3000 Index, which is made up of 3,000 of the biggest U.S. stocks. The Russell 2000 serves as a benchmark for small-cap stocks in the United States. Visit [www.russell.com/indexes/](http://www.russell.com/indexes/) for more information regarding Russell indices. The MSCI EAFE Index is a free float-adjusted market capitalization index that is designed to measure the equity market performance of developed markets, excluding the US & Canada. The MSCI Emerging Markets Index is a free float-adjusted market capitalization index that is designed to measure equity market performance in the global emerging markets. All enclosed material including market analysis data provided Taiber Kosmala & Associates, LLC. There is no duty to update this information. The Wilshire 5000 Total Market Index represents the broadest index for the U.S. equity market, measuring the performance of all U.S. headquartered equity securities with readily available price data. The PHLX Semiconductor Sector Index (SOX) is a capitalization-weighted index composed of 30 semiconductor companies. The companies in the Index have primary business operations that involve the design, distribution, manufacture and sale of semiconductors. The index is designed to track the performance of listed semiconductors. The Case-Shiller Index, formally known as the S&P/Case-Shiller Home Price Index is made up of several indexes that track the value of single-family detached residences using the arms-length and repeat-sales methods. It is used as a barometer not just of the housing market, but also of the health of the broader economy. For more information on the index, please visit <https://www.spglobal.com/>. All information obtained from Taiber Kosmala & Associates (2020). The secured overnight financing rate (SOFR) is a benchmark interest rate for dollar-denominated derivatives and loans that is replacing the London interbank offered rate (LIBOR). Interest rate swaps on more than \$80 trillion in notional debt switched to the SOFR in October 2020.
