

Education Opportunities

The goal of the Foundation's Conservation Education Program is to increase public knowledge, appreciation, and enjoyment of wildlife and natural resources while encouraging a stronger commitment to their conservation through place-based learning.

WHAT CAN WE OFFER?

- **Outreach**
 - Classroom presentations feature authentic specimens and hands-on activities. These programs are available for individual classes and for school events such as STEM nights.
- **K-12 On-Site**
 - TEKS-aligned field trips introduce K-12 students to South Texas ecology and conservation through hands-on outdoor learning. Programs range from half-day visits to overnight experiences.
- **Curriculums**
 - **Rangeland Curriculum**
 - Our free, adaptable, 27-lesson K-5 Rangeland Curriculum is available on PocketLab and includes student worksheets and assignments. Teacher workshops are also available to support implementation.
 - **Project WILD**
 - We are certified facilitators for Project WILD and can provide training to help educators become Project WILD certified.
- **Public Opportunities**
 - We offer spring and summer camps for ages 7-18, providing engaging outdoor learning experiences for young nature enthusiasts.

K-12 field trips and classroom outreach are **FREE!**
