PHOTOGRAPHY - NATURE - CREATIVITY - CONSERVATION

Helping young people see and value the natural world through photography

ABOUT

Hosted by Green Spaces Alliance of South Texas, Picture Your World is a youth nature photography program that connects young people ages 8-18 with nature through photography, outdoor exploration, and creative expression.

We believe that when young people slow down, look closely, and discover the natural world around them, they develop more than photography skills. They build curiosity, confidence, creativity, and a deeper connection to the places they call home.

Through school programs, monthly weekend workshops, and an annual juried photography exhibition, Picture Your World gives young people the opportunity to explore local natural areas, learn from photographers and naturalists, and share their unique perspective through images.

THREE WAYS TO EXPERIENCE PICTURE YOUR WORLD

School Program

Hands-on outdoor learning for 5th-6th grade students

Picture Your World partners with schools to take students beyond the classroom and into South Texas natural areas. Students travel by bus with their teachers for a hands-on photography and nature experience.

Monthly Weekend Workshops

Explore. Photograph Create.

Monthly Sunday workshops are open to youth ages 8-18 and their families. Each workshop takes place in a different natural area, giving young photographers the opportunity to discover new landscapes and subjects throughout the year. Workshops combine: Photography instruction, nature exploration, individual feedback and review.

Annual Juried Photo Exhibition

Participate in the larger picture

Every spring we invite young photographers ages 8-18 from Bexar and surrounding counties to submit their nature photographs to the annual Picture Your World Juried Exhibition. Cash prizes and Honorable Mention awards are presented at our spring awards celebration, and selected photographs are exhibited throughout the summer and fall for the community to enjoy.

SEE THE WORLD. TELL YOUR STORY. PROTECT WHAT YOU LOVE
