

BEAUTY SCHOOL vs TRADITIONAL SCHOOL

Which is the real glow up ✨

Deciding what's next after high school can feel like a big deal, but here's the truth: **there's no one-size-fits-all answer.** Whether you're considering beauty school or traditional college, both paths have unique opportunities to help you chase your dreams. At Academy of Salon Professionals (ASP), we firmly believe in dreaming big and starting strong from day one—and we're here to show you how!

Traditional College: The Classic Route

College is a great choice for those exploring a variety of interests or pursuing careers that require a degree, like business, healthcare, or education. It offers time to learn, network, and figure out your passions!

Why People Choose College:

- Access to a wide range of career paths.
- The "college experience"—campus life, new friendships, and personal growth.
- Time to explore what you want to do long-term.

Things to Consider:

- It's a longer commitment, typically 4+ years.
- Tuition can be expensive, often requiring loans.

Beauty School: The ASP Experience

If you're passionate about creativity and want to start building your career sooner, beauty school could be your perfect fit. At ASP, we take it a step further with a focus on business skills through our Honors program, social media classes, and real-world experiences.

Why ASP Stands Out:

- Dream Big from Day 1: We encourage students to start chasing their goals the moment they walk through our doors.
- Business Curriculum: Learn how to run your beauty business, attract clients, and start making more money faster with our Honors Program.
- Social Media Savvy: We know social media is the key to building a successful career today. That's why we offer social media classes, lessons, and hands-on opportunities to grow your personal brand and dive into your own version of the beauty influencer life.
- Quick Start: Most programs can be completed in less than 2 years, so you're earning money and building your career while others are still in school.

Things to Consider:

- It's not just about showing up—you'll need to hustle, practice, and stay ahead of trends.
- Your success depends on your dedication and passion for building your craft.

The ASP Difference:

At Academy of Salon Professionals, we're not just teaching about hair, makeup, or skincare—we're about helping you build a life and career you love. From business minded activities to exploring social media, ASP gives you the tools to create the career of your dreams.

The real glow-up isn't about whether you choose beauty school or traditional college—it's about choosing the path that excites you and aligns with your goals.

**Whatever you decide,
remember: the future is
yours to create.**

Dream big and go after it.

XOXO
