FLAVORING

Trying to Make an Animal Swallow a Tablet Can Be a Challenge!

We Can Add **Flavor** to Their Medication!

Making it Easier to Give and Animals Will Love It!

No Bull!

Just Solutions!

DOSAGE SIZE

Many Commercial Animal Medications are Available Only in One Size.

That One Size Medication May Not Be Appropriate For All Animals.

A Tablet May Be Too Large for a Particular Cat, **OR**

Another Maybe Too Small for a Horse.

We Can Compound Dosage Forms That Are Just the Right Size!

MEDICINE AVAILABILITY

Drug Manufacturers Often Stop Production on a Low Demand Product...Leaving You Hanging. We Can Obtain the Raw Liquids and Powders to Prepare Dosage Forms That Are Often Superior to Discounted Formulas.

ADMINISTRATION ISSUES

It's Easier and Less Labor Intensive to Give One Medication Rather Than Four.

We can compound Capsules, Creams, and Solutions That Contain Needed Concentrations of Multiple Ingredients.

ADMINISTRATION METHODS

Convenience Is The Key!

We Can Create Custom Skin Preparations, Powders, Liquids, Treats, Suppositories, and Ear Drops.

The Right Administration Method For the Right Therapy!
