# TEST STATIONS

ACP International offers multiple solutions for test stations/locate points. These test stations are suitable for use in telecommunications, cathodic protection and additional applications.

## PolyDome Test Station

Features 3 standard terminals (additional terminals available upon request); removable dome secured with can screw to prevent vandalism; made of durable, impact-resistant high density polyethylene; printed with UV resistant enamel inks. Domes available in orange, yellow, red, green, blue, purple, white & black; standard legends and custom print available.

## Top Hat Test Station

Features 5 quick-release terminals (additional terminals available upon request); twist off cap; made of durable, impact-resistant high density polyethylene; printed with UV resistant enamel inks; Tops available in orange, yellow, red, green, blue, purple, white & black; standard legends and custom print available.

## At Grade Test Station

Features 3 quick release terminals (additional terminals available upon request); installs flush with ground level; fits 6" riser pipe; secured with locking screw; magnet for easy locating, available with orange, yellow and black lids.
