U-Channel Posts

ACP International U-Channel Posts make sign installation fast and easy. We offer a variety of steel U-Channel post sizes and finishes to meet your project requirements. All U-Channel Posts feature 3/8" mounting holes punched on 1" centers for convenient sign mounting.

Our most popular option for the telecommunications industry is the UC-8/GR, a 2 lb./ft. steel post with a durable powder-coated green finish. A galvanized finish is also available.

Hardware Sets

Our hardware sets are specifically designed to match U-Channel posts for a secure, reliable installation. The HDWR-2.5 is designed for use with 2 lb./ft. U-Channel posts.

The HDWR-2.5 Hardware Set includes 1 Bolt, 1 Flat washer, 1 Split lock washer, 1 Hex nut. Ordering Tip: One hardware set is required for each mounting hole. For example, 100 signs with two center-mount holes require 200 hardware sets.

Sign Saver Plates

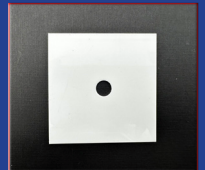

Sign Saver Plates are installed between the sign and the U-Channel post to help prevent
