

Keeping
Your
Residents
Healthy.

Your Health Advocates.

Since 1946, Minnich's Pharmacy has been a Health Advocate for the families and residents of South Central PA. Today, we continue to keep our patients healthy, but with fresh new faces, a new look and a new approach.

As a Health Advocate, we understand the continual need for growth in areas of technology and professional expertise in order to meet the changing needs of our customers. Our focus has and always will be to put the best interest of our patients first. This is an advantage we have as a small, local business when compared to large pharmacy chains. Our patients' needs come first because we are Your Health Advocates.

LONG-TERM CARE SERVICES

At Minnich's, we take our role as Health Advocates seriously, because your health is a serious matter. Our team constantly strives to provide extraordinary pharmacy care, personalized service, and clinical expertise to healthcare consumers in Central PA. In addition to the services we provide to our walk-in patients and local businesses, we also offer long-term care services to help your residents stay healthy. We understand that a healthy facility keeps residents and staff members happy, so we do our best to protect the health of each resident with responsive and reliable service, while maintaining the utmost dignity and respect towards each resident.

PRESCRIPTION DELIVERY

Our pharmacists are dedicated to managing all of your patients' medications, and with multiple daily deliveries available, the Minnich's Mobile team will make sure your residents will get their medication when they need it, even in rain, sleet or snow!

EMAR COMPATIBLE

Compatibility is never an issue with Minnich's. Our system can interface with multiple Electronic Medication Administration Record (EMAR) products.

HIPAA COMPLIANT

Our staff is highly trained and HIPAA compliant to ensure the privacy of your residents and the confidentiality of their medical history.

ON-CALL PHARMACISTS

Our staff pharmacists are on call 24 hours a day, 7 days a week. We never sub-contract on-call hours, so you will always have a familiar Minnich's pharmacist available to you who knows your staff and your residents.

CONSULTATION & EDUCATION

Our consultant pharmacists are members of the American Society of Consultant Pharmacists (ASCP) and are able to provide chart reviews, medication cart audits, and medication pass reviews. They are available to provide inservices and educational meetings for your staff. Educational information is also available upon request for you to display or handout to your residents and staff.

CUSTOM PACKAGING CAPABILITIES

We have the capability of multiple types of customizable and facility-specific packaging to make it safe and easy for your residents to get their correct dose at the right time. Accuracy, accountability, and efficiency are all just as important to us as they are to you.

EXTENSIVE INVENTORY

We keep an extensive inventory on-hand to enable us to fill all new orders the same day with few instances where a medication is not available the day it is ordered. In addition, we are able to do prescription compounding for topical gels and other specialized medications.

BILLING & INSURANCE

Our office is always up-to-date on the latest information regarding insurance and billing. We are staffed with accounting specialists who are experienced with long-term care billing issues and the coordination of benefits with Medicaid, Medicare and Medicare Part D. They are always happy to answer any questions your staff or residents may have regarding these issues.

Your Health Advocates.
