Specifications

SLAL3 - Solar Area Light

Provides moderate ambient,
attractive and low glare

Lumen: 1500LM

Charge Time: 5-6 hours

Usage Time: 9-12 hours

IP Grade: IP65

Material: Die-cast aluminum

Battery: LiFePO4 (Lithium Iron Phosphate)

Lighting Area:

16 foot Light Radius at 8 foot tall

20 foot Light Radius at 10 foot tall

Ideal distance between lights:
32 - 40 feet

Set screws to tighten to 3" post

Recommended pole height is 8'-10' to the top panel

Instructions:

The Solar Area Light comes with a remote control.

The ON and OFF buttons turn the lights on and off. Once you hit the ON button, the lights will stay on except when charging during the day. The sun symbol at the top of the wheel will set the light at full brightness, while the half sun at the bottom of the wheel will set the light at half brightness. The + and - symbols will either increase or decrease the light by 5%. The M button is for the mode and changes the grade of the light. AUTO turns on intelligent lighting to automatically adjust how much power is being used. The 3H, 5H, and 8H buttons are timers and will leave the light on for 3, 5, and 8 hours respectively.
