

Will A Majority Of People In Your State Be Fully Vaccinated Within The Next Year?

Projections are based on each state's current rate of vaccination.

United States

At the current rate of vaccinations, Alaska will not hit 70% til after 7/15/21 Therefore mask wearing and social distancing will be recommended, for the next year.

Note: The average rate of fully vaccinated people is based on the last seven days of preliminary data from the CDC.
