#### How Supplied:

Each Rx will come with #4 – single use vials in a labeled Rx bottle.

The overfill in the vial should be discarded after the dose has been drawn up. These are **single dose vials**....

#### Directions for use:

Using insulin syringe, inject 0.5mls (50 units) Subcutaneous in abdominal area weekly. Discard the vial after use.

#### Storage:

**Keep vials in freezer.** Remove 1 vial from freezer and let defrost for 15 minutes before use.

#### Shipping:

In state shipping is available for a fee. Call for availability.

**If you have any questions, please give me a call.**

Thanks,

**Randy Thurmond R.Ph.**
