Pre-Pellet Laboratory Tests (male)
Outside Physician Signature Needed

Patient Name _____ Date _____

The following tests are done as part of the Pre-Pellet Lab Panel. You need 12 hours of fasting, drinking water only. Usually this means no food after a normal dinner and draw labs the next morning. Bring a snack to eat after they draw your blood.

LAB ORDER

- CBC – complete blood count
- CMP – comprehensive metabolic panel
- Ferritin
- Lipid panel
- PSA – prostate specific antigen [abstain from sex for 3 days prior]

Hormones

- Estradiol, Estrone, FSH, LH, Prolactin
- TSH, Free T4, Free T3
- DHT – dihydrotestosterone, Total Testosterone
- Free Testosterone
[Quest Test 18944; LabCorp Test 500726]

Applicable ICD-10 Billing Codes

- ____ E29.9 (testicular dysfunction, unspecified)
____ E34.9 (endocrine disorder unspecified)
____ R68.82 (decreased libido)
____ R53.83 (other fatigue)

You may take this lab order slip to any of the above labs as long as it is signed by a licensed physician.
