PRODUCTS, INC.**

Elevator cabs of uncompromising quality

In 2004, Canton Elevator founded Canton Architectural Products for the purpose of becoming the sole provider of cabs for the company. Now, thousands of successful installations later, the cabs also are available as a stand-alone product. Operating under the same roof as Canton Elevator, Canton Architectural Products carries on the same traditions of quick turnaround, low cost and high-quality products for the industry.

Our product line includes all types and configurations of standard and custom cabs from large and small service cabs to wood core or steel shell wall construction. Select from our standard line with several available materials and finishes or we'll build your custom design to order from plans and specifications. Stainless steel, bronze, glass, wood veneer, custom millwork, marble and granite are just some of the materials available.

Many of the nation's leading elevator contractors put their trust in Canton Architectural Products to supply superior-quality elevator cabs at reasonable prices. Our services include cabs for new construction, cabs and cab components for modernization or repair, and design and value engineering consultation.

3D Software Design

Wood Core Design

Steel Shell Design

Flush Laminate Walls

Raised Laminate Panels with Black Reveals

Raised Laminate Panels with Stainless Reveals

Raised Stainless Panels with Black Reveals

Stainless Steel Flush Walls

DESIGN AND QUALITY FEATURES

- Every cab is fully assembled, erected and subjected to a thorough inspection process prior to shipping
- All cabs are engineered using 3D modeling software
- All cabs are ASME A17.1 code compliant
- All steel wall and canopy panels come standard with a durable powder coated finish
- All side walls, canopies and ceilings are packed and shipped pre-assembled for quick and simple assembly in the field
- All lighting is mounted, pre-wired and tested prior to shipping to save additional field labor
- Canopy panels are fabricated from 12 guage steel
- Steel walls, entry posts and transoms are fabricated from 14 guage steel

Call today for a free, no-obligation consultation. We welcome the opportunity to show you why Canton Architectural Products is your best choice for elevator cabs of uncompromising quality.
