ABOUT OUR LIST

The Fielding's Bourbon collection spans from readily available to very hard to find, small batch, single barrel, aged, and anniversary edition bourbons. The list will change over time.

WHAT IS BOURBON

American made whiskey that is distilled from a mash having at least 51 percent corn, the remainder being grains. Popular grains added to a mash include malt, rye, barley, and wheat. Aging must take place in a new, charred oak barrel. The whiskey cannot enter the barrel at higher than 125 proof, and cannot enter the bottle with a proof of less than 80. After aging, and before bottling, only water may be added. Bourbon is America's only native spirit, declared such by Congress in 1964.

ORIGINS

Distilling was most likely brought to present-day Kentucky in the late 18th century by Scots and Scots-Irish. The invention of bourbon is often attributed to Elijah Craig (Larceny & Elijah Craig Bourbon), a Baptist minister and distiller who is said to have been the first to age the product in charred oak casks, a process that gives bourbon its reddish color and distinctive taste.
