

Frontend Developer - React

Maqii is seeking a talented Mid-Level Frontend Engineer with expertise in React to join our team. The ideal candidate will be responsible for designing and developing user interfaces for web applications and be comfortable working in a fast-paced and collaborative environment. As a frontend developer at Marqii, you will be responsible for maintaining and improving the user experience of our applications, implementing new features, and contributing to our codebase.

Responsibilities:

- Collaborate with product managers, designers, and other developers to create responsive, user-friendly interfaces for our web applications.
- Write clean, efficient, and well-documented code that adheres to our coding standards.
- Ensure that all code is tested thoroughly and meets our quality standards.
- Optimize web applications for maximum performance and scalability.
- Collaborate with backend developers to integrate front-end and back-end functionality.
- Stay up-to-date with emerging trends and technologies in front-end development, particularly in the React ecosystem.
- Mentor junior developers and provide technical guidance to other team members as needed.

Requirements:

- Bachelor's degree in Computer Science or a related field or relevant working experience
- 3+ years of experience in front-end development, with a strong emphasis on React.
- Demonstrated experience in developing and deploying web applications using React, Redux, and related technologies.
- Understanding of modern web development practices, such as responsive design, progressive web apps, and mobile-first development.
- Ability to write clean, maintainable, and well-documented code.
- Strong understanding of software development principles such as SOLID, DRY, KISS, etc.
- Ability to work collaboratively in a fast-paced, Agile environment.
- Excellent verbal and written communication skills.
- A passion for learning and staying up-to-date with emerging technologies and trends in front-end development.
