

Liberty Hill Pharmacy

FAMILY OWNED & OPERATED

Rx & Compounding Center

Let's Make Medicine Personal Again.

Pharmacy compounding is the art and science of preparing custom medications for individual patients.

The practice of compounding dates back to the very origins of pharmacy, when all medications were compounded. Compounded medications are made based on a physician's prescription to combine the exact strength and dosage form required by the patient. Here are just a few examples:

- a highly specific strength for hormone replacement therapy
- a topical cream to deliver pain medication exactly where it's needed
- an allergy-free, gluten-free, or lactose-free formulation
- a form that's easier to take, such as a liquid or rapid-dissolve tablet
- a flavored lollipop or gummy for your child, or even a treat for your pet

Liberty Hill Pharmacy & Compounding Center can work with you and your doctor to customize your medication exactly as you need it.

Do you have questions about pharmacy compounding?
We have answers.

Whitney Brace, PharmD, RPh has worked in small, locally-owned pharmacies her entire career, becoming a strong advocate of independent pharmacy and an expert in customized prescriptions (compounding). Whitney graduated from the University of Texas at Austin with a Bachelor's degree in Chemistry (2005), then did graduate work in polymer chemistry at Texas State before returning to U.T. to pursue her Doctor of Pharmacy degree (2011).

Whitney opened Liberty Hill Pharmacy & Compounding Center with her husband Conor in July 2015, shortly after their eighth wedding anniversary.
