

GLOBAL DISASTER SOLUTIONS

RETAIL MANUFACTURING

LOSS EVENT: FLASH FLOOD

24-HOUR CALL CENTER: 877.511.2962

PROJECT OVERVIEW

Historic flooding ravaged a local community, inundating most of the city's businesses with severe water damage. A major industrial manufacturing plant in the area experienced over four feet of water intake across 21 buildings on its 150-acre facility. Following the recision of floodwaters, Cotton's Emergency Response Team dispatched restoration, logistical, and emergency catering support services within 24-hours.

Once on-site, Cotton performed initial incident assessments, established strategic remediation plans based on the client's designated priorities, set up equipment, and began the recovery process to restore facility operations. Logistical support facilities, including emergency power, temporary climate-controlled structures, potable water services, fuel, sewer, and necessary electrical hookups were provided. In addition, Cotton provided food services to those on-site.

THE **COTTON** DIFFERENTIATOR

- Saved client upwards of **SEVEN MILLION DOLLARS** in potential lost revenue
- **ZERO** accidents or injuries
- The project was completed **UNDER BUDGET**
- The project was completed **AHEAD OF SCHEDULE**
- Over **200 MEALS** were served daily

TURNKEY SERVICES PROVIDED

- Mucked out facility prior to remediation efforts
- Established building stabilization
- Cleaned accessible areas including sidewalks and exterior buildings
- Established 24/7 emergency power in buildings for both daytime and nighttime crews
- Set up desiccants and dehumidifiers throughout affected areas
- Removed affected documents, carpet, ceiling tile, work stations, base, sheetrock, and wet trash
- Cleaned, secured, and sanitized exposed structures with antimicrobial solution
- Full encapsulation
