THE YAMAHA RIVAGE PM SERIES — RIVAGE PM10 & RIVAGE PM7

Hollywood Sound Systems is excited to present Yamaha's groundbreaking RIVAGE PM SERIES of digital mixing systems — the new generation of PM Consoles that have quickly become standards in large-scale live sound and recording applications.

The Series launched with the release of the innovative flagship console — the RIVAGE PM10 — quite unlike anything we've ever heard before.

The RIVAGE PM7 is the latest addition to the Rivage family. Despite the cutting-edge technology, if you've ever worked with any Yamaha digital console in the past 15 years — you'll feel quite at home using the

PM10 or PM7 — the layout is intuitive and intelligently designed for ease-of-use and familiarity.

THE RIVAGE PM10

The Rivage PM10 Digital Mixing System consists of the DSP-R10 DSP engine, the CS-R10/CS-R10S control surface for intuitive hands-on operation, one or more I/O Rack units for input and output connections, and one or more network cards for connectivity over TWINLANe and Dante.

- 144 mixable channels
- 72 mix buses and 36 matrices
- 2 stereo and 2 cue buses
- Hybrid Microphone Preamplifiers
- Rupert Neve Design transformer circuitry and acclaimed SILK processing
- 50 plug-ins that model your favorite limiters, EQs, and other processors
- Control via an iPad using Rivage PM StageMix and Rivage PM Editor apps

THE RIVAGE PM7

The Rivage PM7 Digital Mixing System is based around the CSD-R7 Digital Mixing Console — which has the same size and same control layout as the PM10 — but, unlike the PM 10, it features built-in DSP. It uses one or more I/O Rack units for input and output, and dedicated interface cards for network connectivity over TWINLANe and Dante.

- 120 mixable channels
- 60 mix buses and 24 matrices
- 2 stereo and 2 cue buses
- Hybrid Microphone Preamplifiers
- Rupert Neve Design transformer circuitry and acclaimed SILK processing
- 48 plug-ins that model limiters, EQs, and other favorite processors
- Control via an iPad using Rivage PM StageMix and Rivage PM Editor apps
