

## DENON ENVOI Quick Start Guide

Follow this quick start guide of basic steps for using the Denon Envoi Portable PA System. Questions? — give us a call! — 323-466-2416 We're here to serve you.

- 1) Turn on the main power switch located in the lower section of the back panel.

- 2) Turn on the RF Receiver.

- 3) Turn on the RF Transmitter (on the bottom of the mic). As you test the microphone, adjust volume of the speaker.

### CHANGING CHANNELS — IF YOU ENCOUNTER INTERFERENCE WITH THE MICROPHONE

- 4) Change channel via up/down buttons — find a channel number that works for your location — ultimately one that has no interference.

- 5) Open transmitter (the microphone), and locate the IR Symbol inside the battery compartment.

- 6) Point the IR Symbol on the transmitter (mic) toward the IR Symbol on the receiver — it's important for the 2 Symbols to "see" each other. Then, press the ASC button.

- 7) The IR light will flash momentarily & turn off. The RF light will light up, indicating the mic and receiver are in-sync.

- 8) Make sure to close the battery compartment of the RF transmitter the mic. And be sure to raise/extend the antenna.

Now, you should be good to go!
