

**PINE BARK EXTRACT  
(PYCNOGENOL)  
(VERY BENEFICIAL FOR GOOD HEALTH)**

Pine Bark Extract comes from the bark of a pine tree that grows in southwest coastal France.

As a strong antioxidant and inflammation reducer it has the potential to reduce blood sugar for diabetes, and improve cardiovascular and circulatory function. It does this by limiting the buildup of fat, reducing oxidative stress, and the likelihood of blood clots.

It helps allergies by preventing the release of histamine, and can help stop the development of both cataracts and retinopathy.

It works like Viagra for erectile dysfunction by keeping blood vessels healthy and boosting the body to produce more Nitrous Oxide (NO). NO helps dilate blood vessels to allow more blood flow to the sexual organs.

Pine Bark Extract has been shown to decrease tinnitus in the ears by 62%, to improve memory and everyday thinking in the elderly, and even helps kids with ADHD.

It helps keep your blood clot free and flowing, shaves days off healing time, and promotes a youthful glowing wrinkle free complexion.

It also helps promote collagen and elastin production, which are the building blocks that line your blood vessels.

**WHEN YOU CONSIDER ALL THE BENEFITS THIS ONE SIMPLE EXTRACT HAS TO OFFER—IT'S ONE OF THE BEST INVESTMENTS YOU CAN MAKE FOR YOUR HEALTH.**
