

LED Enhanced Signs

SA-SO's finished LED Enhanced Signs aid in increasing driver and pedestrian awareness to help them avoid accidents in school zones, heavy traffic or accident-prone areas. Available with either amber (yellow), red, or white LED lights. These signs are completely assembled and ready to use right out of the box! Low cost and low maintenance, they utilize renewable energy and can easily enhance the visibility of any sign, anywhere. Please note: LEDs embedded into a sign are in compliance with section 2A-1 of the MUTCD. The light colors should be either white, or match the color of the sign.

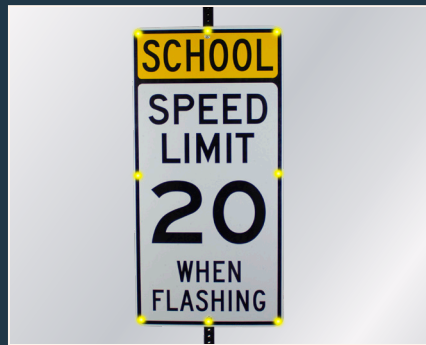

Speed Limit Sign
